

## The Dimensional Ecology of the Omniverse

The Dimensional Ecology of the Omniverse: New Book Reveals New Scientific Evidence of the Multiverse Concept Written by Yale graduate Alfred Lambremont Webre, this startling book examines the idea that humanity lives on a planet in one universe that exists in a multiverse. Webre, a leading thinker in the field, details his arguments with simple and stunning clarity. In 2000, author Alfred Lambremont Webre released his book, Exopolitics: A Decade of Contact, which founded Exopolitics, the science of relations among intelligent civilizations in the multiverse. Immediately, Webre became a leading extraterrestrial and time-travel whistleblower and as a result, attracted a lot of attention from both the scientific and political communities. With The Dimensional Ecology of the Omniverse, Webre cements his role as the developer of the Exopolitics and Dimensional Ecology models of the Omniverse. As Webre points out, the details of his book are vital to help readers understand the connection between science and spirituality. The book reveals new scientific evidence on matters like the afterlife, the human soul, reincarnation and God, says Webre. God used to be a matter of personal belief, but Science is confirming spirituality. As the book also shows, Scientists now know that humanity lives on one planet in one solar system in one universe in a multiverse that has, as one Scientist wrote: a humungous number of universes in it. I also detail the evidence that souls and God in the spiritual dimensions are co-creating the universes of the multiverse. Each of our souls is a holographic fragment of God, the Source. These revelations have the potential to change the world. Synopsis: Alfred Lambremont Webres new book, The Dimensional Ecology of the Omniverse, integrates replicable empirical evidence from intelligent civilizations in the

multiverse and from the intelligent civilizations of souls and God in the Afterlife. The book demonstrates a new functioning ecology of intelligence in the dimensions in the Omniverse. Early reviews of the book have been undeniably positive. Alfred Lambremont Webres The Dimensional Ecology of the Omniverse is of extreme importance because multidimensional intelligence opened to all humans when the Mayan Calendar ended in 2011/2012. We are receiving contact from the fully inhabited omniverse that connects with us by telepathy and teleportation in the quantum dimension of our world. Webres hypothesis dimensionality is the key design criteria of the Omniverse as discrete bands of conscious energy by which intelligence organizes itself synchronous with my nine-dimensional model that describes how other dimensions contact humans. Webres compact and easy-to-read book is a brilliant compilation of solid scientific evidence for the existence of human souls that reincarnate and exist in parallel lives in many dimensions, frequently as extraterrestrials! This is a must-read for anyone who wants to fully engage with many dimensions to end absolutely any fear of abandonment, death, or the future, wrote Barbara Hand Clow co-author with Gerry Clow of *Alchemy of Nine Dimensions: The 2011/2012 Prophecies and Nine Dimensions of Consciousness*. About the Author: Alfred is a graduate of Yale University and Yale Law School in international law and was a Fulbright Scholar in international economic integration in Uruguay. He has taught economics at Yale University and constitutional law at the University of Texas. Alfred was general counsel to the New York City Environmental Protection Administration, a futurist at Stanford Research Institute (where he directed the proposed 1977 Carter White House extraterrestrial communication study), and was a NGO delegate to the United Nations and the UNISPACE conference. Alfred is active with non-profit organizations

concerned with peace, the environment, human rights and social justice, consciousness, and intelligent life in the Omniverse.
