

International Handbook of Neuropsychological Rehabilitation (Critical Issues in Neuropsychology)

This volume provides comprehensive international coverage of neuropsychological rehabilitation. It contains scientific discussions of dynamic brain changes (genetics, structure, physiology and hormones) plasticity of the central nervous system, functional reorganization and brain repair in response to treatment in all stages, and emphasizes acute care of early and precise diagnostics. It is intended for clinicians, professionals and students in neuropsychology, health psychology, rehabilitation, behavioral neurology, occupational and physical therapy.
